

A sharing session with Prof Curtis – titles and blurbs

8 Dec 2023

Dr Simon Wang BU	<p align="center">Customizing ChatGPT to Analyze Arguments in SCMP Letters to the Editors</p> <p>Discover the power of customizing ChatGPT via Poe.com to analyze SCMP letters to the editor, using the simplified Toulmin's model for identifying claims, data and warrant as well as associated linguistic features and rhetorical strategies.</p>
Dr Lam Yan Yan PolyU	<p align="center">Utilizing AI for Effective Communication: Exploring Speech Writing and Invitation Letters with GenAI.</p> <p>Explore how GenAI can be used for speech writing and invitation letters, enabling students to leverage artificial intelligence while honing their writing, editing, and communication skills. By evaluating and revising the generated drafts, students can demonstrate their ability to incorporate subject-specific strategies for effective communication.</p>
Dr Wesley Curtis & Lena Ostaszewska CityU	<p align="center">Enhancing Independent Learning in EAP 1: Harnessing Generative AI for EAP Students at CityU</p> <p>Our QAC framework and creative integration of GenAI into existing EAP curricula via the development of student guides for using GenAI in partial fulfilment of the course's independent learning component.</p>
Dr Miranda Legg HKU	<p align="center">When to integrate and when to discourage the use of GenAI?</p> <p>This will briefly outline how CAES is attempting to balance the integration of AI literacy training and discourage the use of GenAI when it hinders the development of key academic literacy skills.</p>
Prof Neil Hunt Lingnan	<p align="center">Generative AI @ CEAL: Slow and Steady</p> <p>Use of Generative AI in CEAL at Lingnan is currently driven by personal interest and on an informal basis. This presentation provides a brief insight into current uses and how AI will be integrated into courses.</p>
Kin Hun Tang, & Jasmine Chen UST	<p align="center">Incorporating GenAI into process writing for academic essay writing</p> <p>This talk explores examples of using ChatGPT in helping students generate feedback to help and support them in their academic writing. Students utilised Chat GPT as a writing assistant to generate suggestions to improve their written language for academic purposes by integrating their in-class learning to generate prompts, revise their writing and critique essay outlines.</p>

Adam Forrester PolyU	Unlocking Potential: How Students are Harnessing the Power of GenAI This talk will look at how GenAI has been integrated into various ELC subjects at the ELC. It will conclude with some student voices with their thoughts on GenAI.
