

GETTING Data for research

Dennis Fong

Purposes

Based on my experience on ELC projects, we will

- Discuss how you can transform your project ideas into a sound project proposal ; and
- Explore what needs to be done, in terms of research / evaluation, when executing your project.

Agenda

- Steps to transform your ideas to a sound proposal
- Procedures

Step 1: What are you doing (FOR YOUR INFO)?

Two types of ELC project

- Develop teaching and learning resources
 - Developing an online interactive **tool** (e.g. enquiring grade distribution)
 - Developing XXX for ELC 9999 (e.g. **videos / a Blackboard course**)
- Conducting research to inform teaching and learning
 - Exploring the effectiveness of XXX approach (e.g. **visible thinking**)
 - Understanding the language needs of XXX (e.g. **senior year students**)

Implication: Project Funding to apply

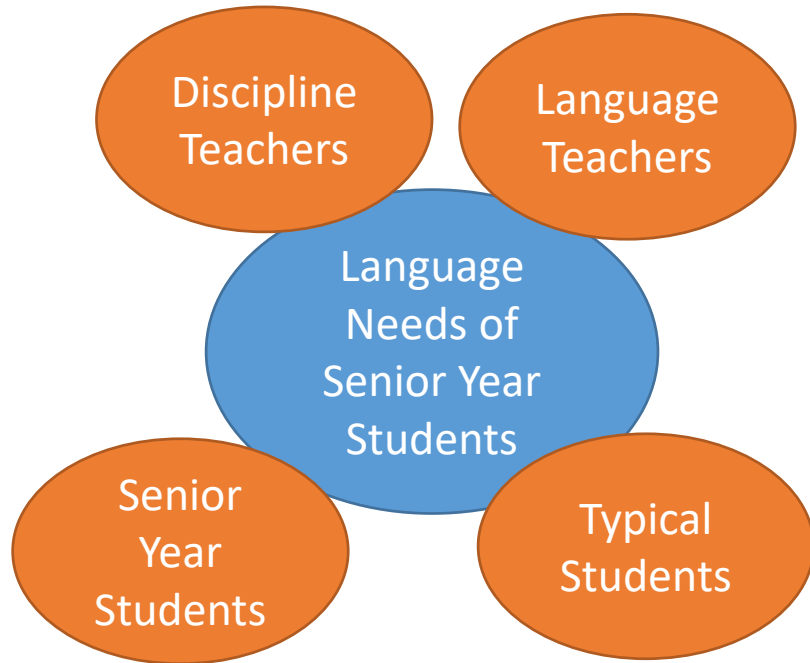

Step 2: What are you doing (FOR POLYU)?

- Conducting **research** to inform teaching and learning
 - Findings / Recommendations
 - e.g. a list of factors / a list of support measures / recommendations for T&L
 - Sharing these with
 - subject teachers / leaders / administrators / centre management?
 - PolyU staff /ELT community?
- Develop teaching and learning **resources**
 - Findings / Recommendations (See above)
 - The resources
 - The effectiveness of the resources (performance + attitudes)

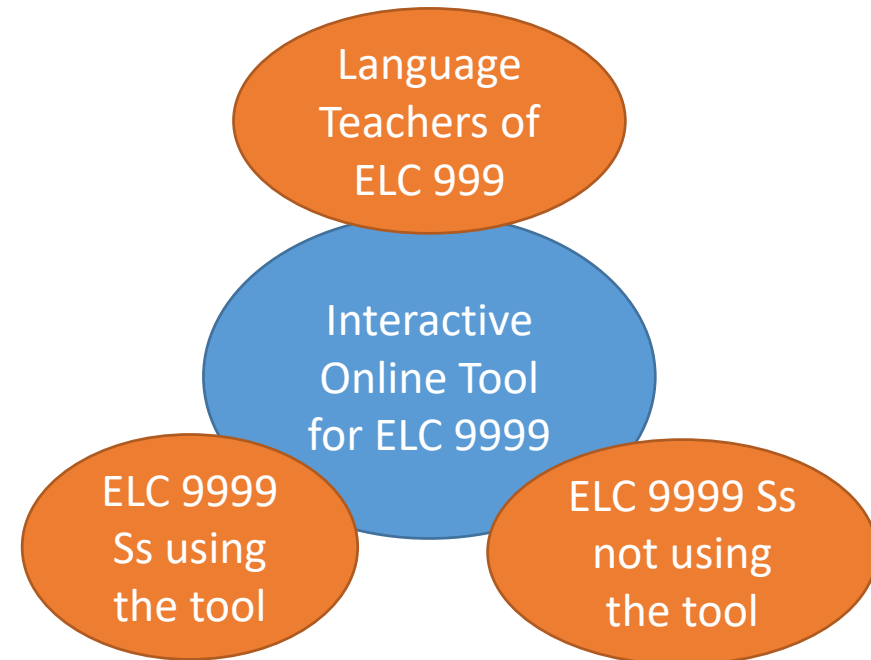

Implication: Research Design / Evaluation

Step 3: Who are the key stakeholders?

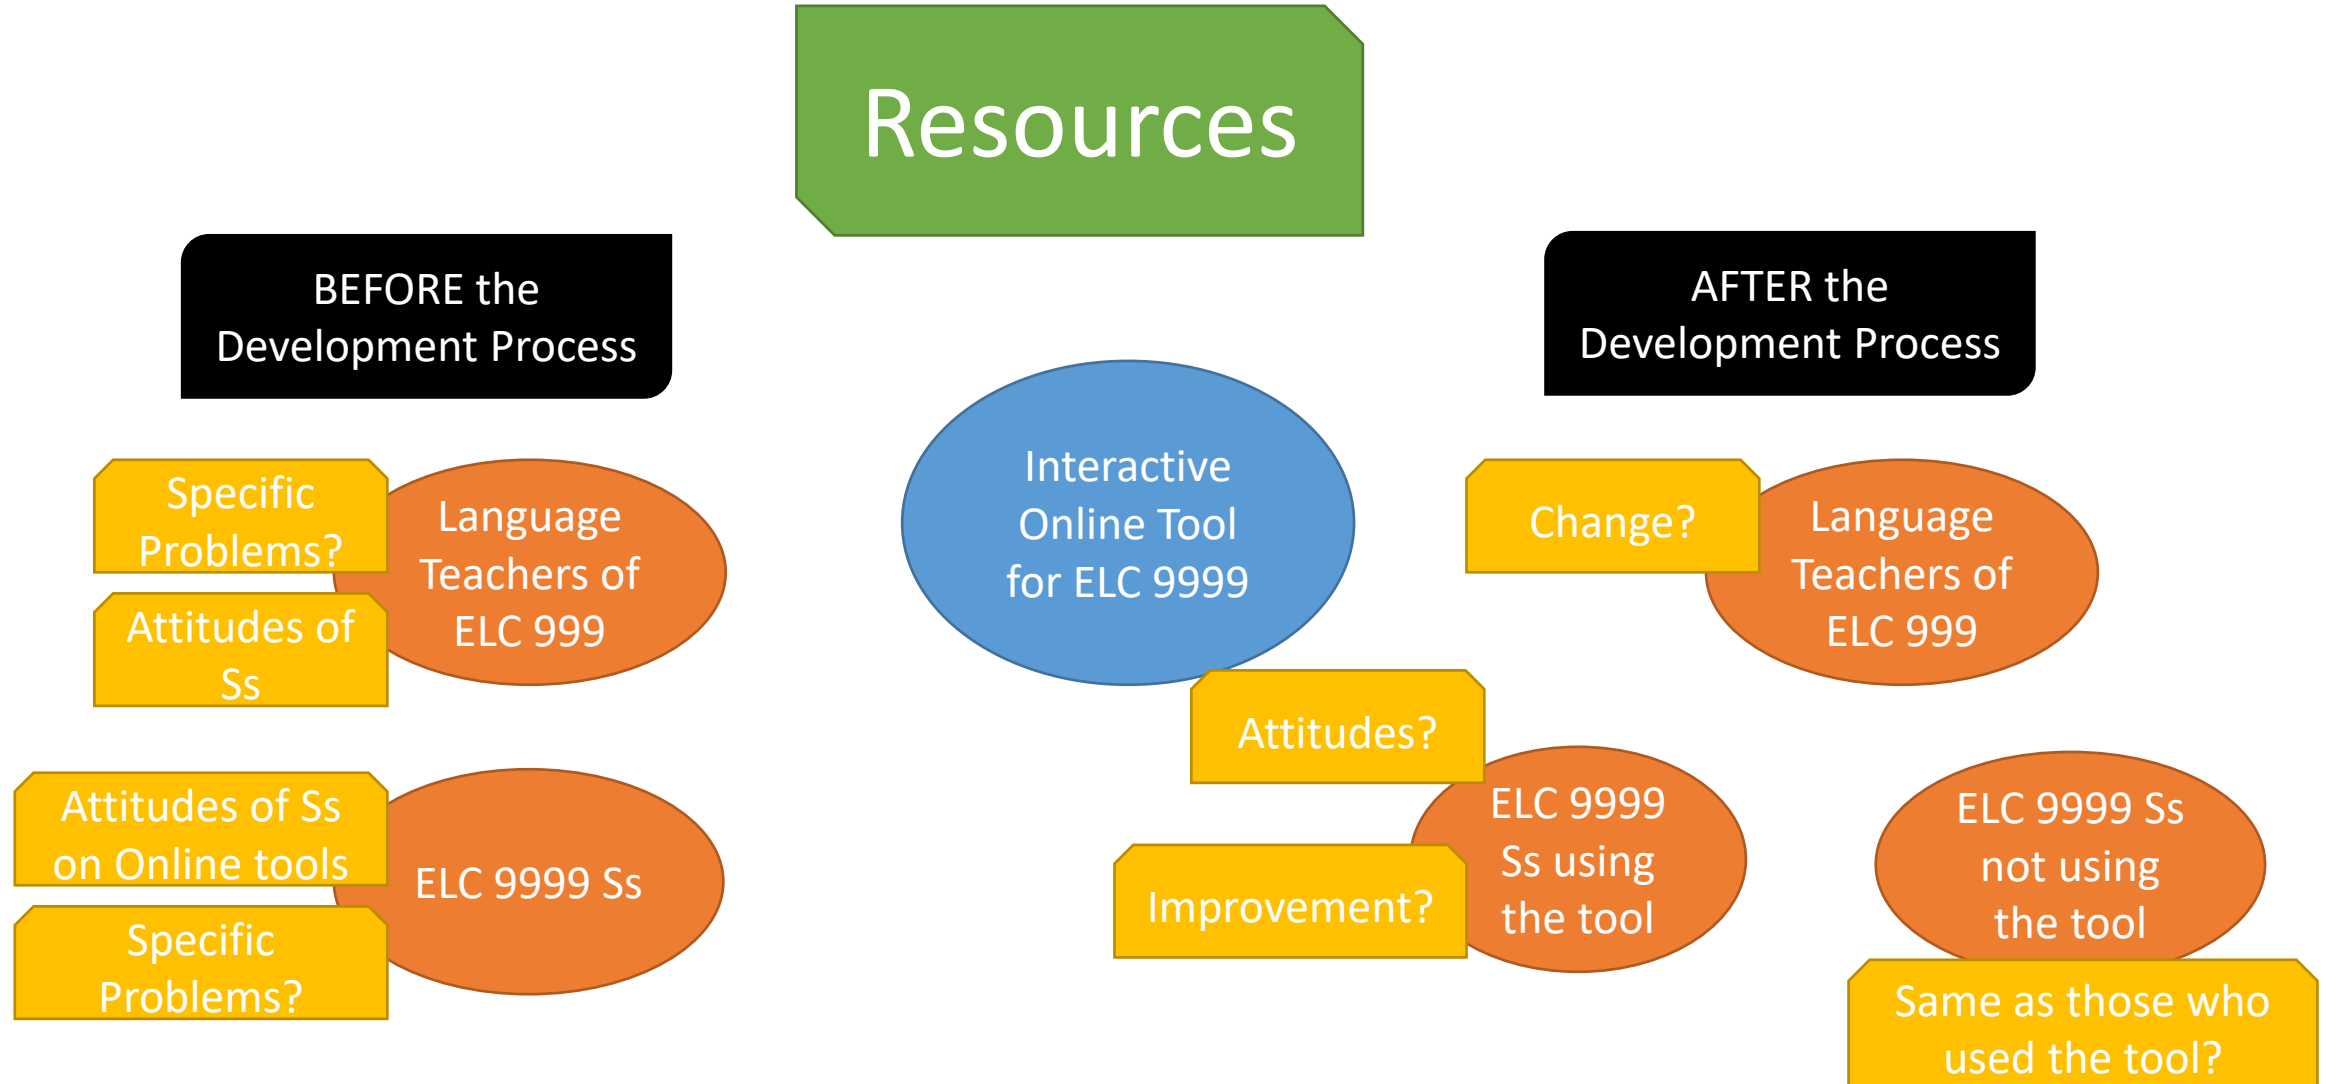

Research

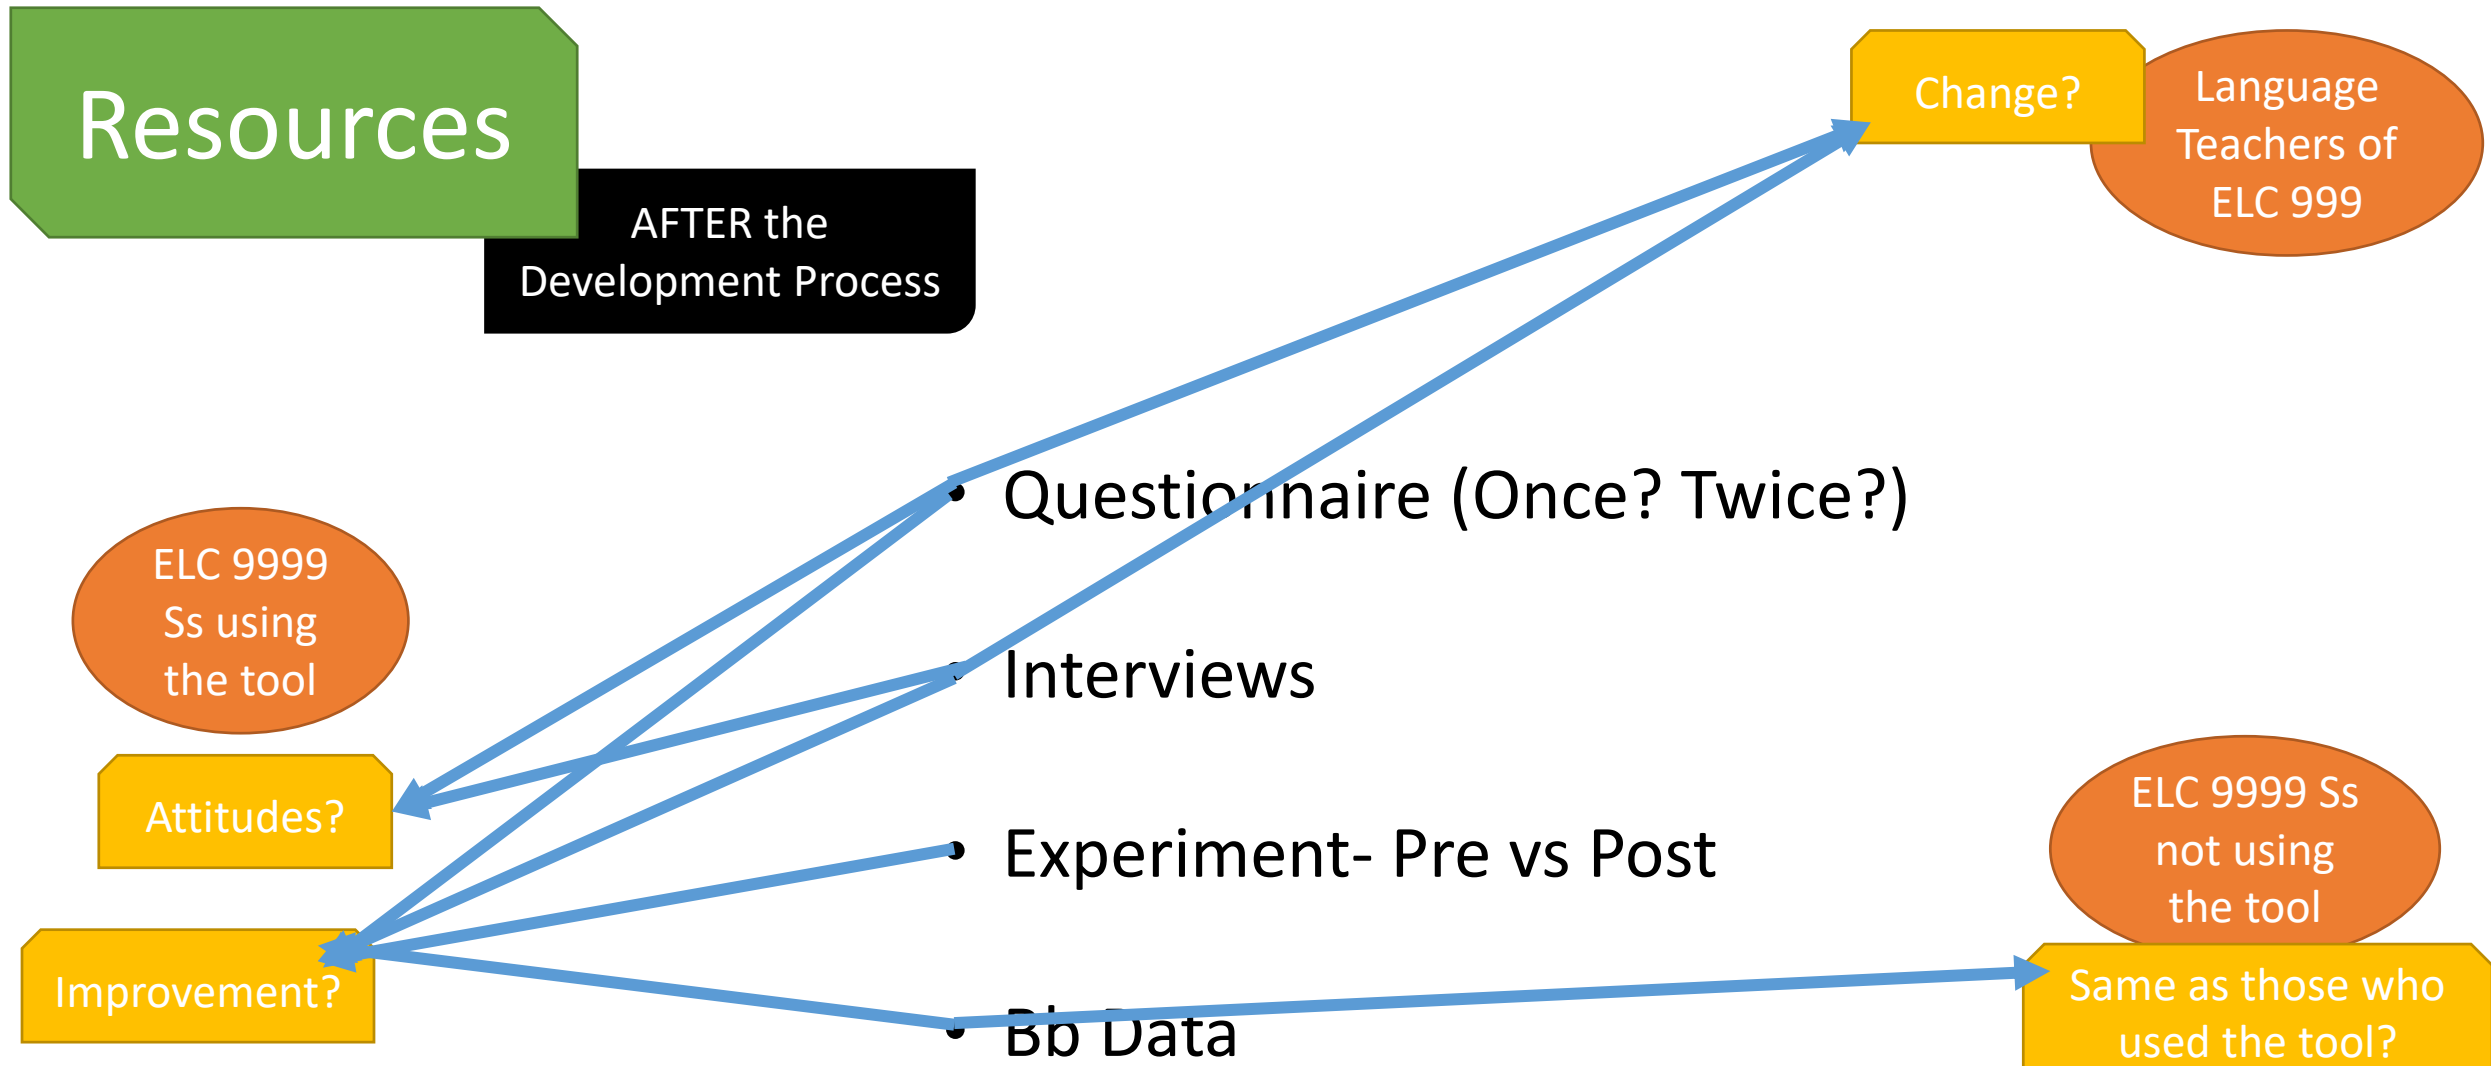

Resources

Step 4: What do we want from the key stakeholders?

- Step 5: What are your research questions?
- Step 6a: How to answer your research questions?

Step 6b: How to answer your research questions?

Considerations

- Feasibility → Who will do it WITH you? SL support?
- Feasibility → Will you get the data?
- Feasibility → How easy to manage? (e.g. Experiment)
- Validity / Reliability
 - Quantitative → Larger Sample Size (>30, each group)
 - Qualitative → Representative Sample
- YOUR TIME → Get a PA?
- Budget → Incentives for students? + PA Time?
- Publishable? (Optional)

Data

Procedures for collecting data YOURSELF

- Ethical Approval: <https://www40.polyu.edu.hk/rohsears/login.jsf>
 - Information Sheet
 - Consent Form
-
- Ask them to give you EVERYTHING, as long as it is ethical!

Procedures for collecting POLYU / ELC data

Key Considerations

- Types of Data
 - ELC Blackboard Data
 - Other Data (Very difficult → Talk to the right person first!)
 - Going back → Collect everything yourself!
- Application
 - Key Question
 - Publication (PD session + Conference Paper etc) ?
 - Or no Publication? (Internal QA)
 - 2nd Important Question
 - Are you supposed to have the data?

Procedures for collecting POLYU / ELC data

- Fill in the data request form
- Get Bruce to sign (Do it first?)
- Send the signed form to the approving authority
- Get the approval memo and talk to Alan Cheng of ITS for Bb data (Do it first?)

Important info

- Ask for NO SID or Masked SID
- Ask for NO SID or Masked SID
- Ask for NO SID or Masked SID

Thank you!
