<tr>
<td>Objectives</td>
<td>This subject aims to develop the English language and communication skills required by students to discuss, propose and report scientific studies in writing.</td>
</tr>
</tbody>
</table>

### Intended Learning Outcomes (Note 1)

Upon completion of the subject, students will be able to:

- describe and integrate data and sources in scientific writing critically and coherently
- organise and produce scientific reports coherently and in a scientific manner
- plan, organise and produce clearly written, logically developed and convincing proposals of scientific projects.

To achieve the above outcomes, students are expected to use language and text structure appropriate to the context, select information critically, and present and support stance and opinion.

### Subject Synopsis/Indicative Syllabus (Note 2)

The content is indicative. The balance of the components, and the corresponding weighting, will be based on the specific needs of the students.

- Introducing a study in technical reports and proposals
  - Explaining the background to a study; reviewing, synthesising and critiquing sources and previous studies; stating objectives; describing the methodology; justifying a proposed project.

- Presenting study results in scientific reports
  - Describing and interpreting results; explaining causal relationships; discussing implications; presenting conclusions.
- Organising scientific reports and proposals
  Organising the content logically and systematically; maintaining coherence and cohesion.

- Using appropriate style and tone in scientific reports and proposals

### Teaching/Learning Methodology

(Note 3)

The study method is primarily seminar-based. Activities include teacher input as well as individual and group work involving drafting and improving texts. Students will be referred to information on the Internet and the ELC’s Centre for Independent Language Learning.

Learning materials developed by the English Language Centre are used throughout this course. Additional reference materials will be recommended as required.

### Assessment Methods in Alignment with Intended Learning Outcomes

(Note 4)

Total 100%

Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:

This subject adopts the method of 100% continuous assessment. Students’ writing skills are evaluated through assessment tasks designed to achieve the learning outcomes. Students are assessed on the accuracy and the appropriacy of the language used in fulfilling the assessment tasks, as well as the selection and organisation of ideas. The persuasiveness of the project proposal will also be assessed.

### Student Study Effort Expected

Class contact:

- Seminars 26 Hrs.

Other student study effort:

- Classwork-related and assessment related preparation and self-access work 52 Hrs.

Total student study effort 78 Hrs.
